

Statement of the Distribution Mechanism of ET Profit

1. As described in the White Paper, 80% of the income from the EXX platform will be allocated regularly to the ET holders and 15% serves as the rewards for the promotion campaign in the EXX transaction platform. The distribution mechanism: The profit generated in the transaction-mining with specified tokens will be distributed in the proportion to the ET holdings.

2. Profit distribution is based on a 24-hour cycle. Starting from 0 o' clock every day (GMT+8), the profit will be accumulated hourly in the proportion to the circulative ET held by the users and will be released to them after the accounting that begins at 9:00 am in the next day, is completed.
